General information

All our lamellas are being produced in our up-to-date facility in Ukraine, which is provided of the latest “Neva” technology. This all makes us able to produce a very accurate end-product. After production our lamellas are being stored in our conditioned warehouse, where we take special measures (such as plastic wrapping and strengthening of the bundles) to secure all our products for shipment.

Thickness: The tolerance regarding the thickness of our top layer production is $\pm 0,2$ mm, some pieces can be slightly thicker.
Quality: The quality of 10% of the lamellas can slight differ.
